ST. BENEDICT: WED. JULY 11, 2018

A sixth-century abbot who gave Christian monasticism its lasting foundation in Western Europe. For his historic role as the "Father of Western Monasticism," (a co-patron of Europe (along with Saints Cyril and Methodius). St. Benedict is also the patron saint of Pope Benedict XVI's pontificate. In a 2005 general audience, the Pope said St. Benedict was a "powerful reminder of the indispensable Christian roots" of Europe. He cited the monk's instruction to "prefer nothing to the love of Christ."

Born to upper-class parents in modern-day Italy during the year 480, Benedict was sent to Rome to study the humanities. However, he soon became disgusted with the loose morals that prevailed among the students. Withdrawing from the city, he lived briefly with a group of monks, then as a hermit.

The young man spent three years in solitude, facing and overcoming severe temptations through prayer and asceticism. Only after doing so, did he have the confidence to emerge as an organizer of monastic communities. His first monasteries were established in the Anio valley outside Subiaco. Benedict's monasteries in Subiaco became centers of education for children, a tradition which would continue in the order during his lifetime and beyond. His monastic movement, like its forebears in the Christian East, attracted large numbers of people who were looking to live their faith more deeply.

During 529, Benedict left Subiaco for Monte Cassino, 80 miles south of Rome. The move was geographically and spiritually significant, marking a more public emergence of the Western monastic movement. Benedict destroyed a pagan temple atop the mountain, and built two oratories in its place. It was most likely at Monte Cassino that the abbot drew up a rule of life, the famous "Rule of St. Benedict," which emphasized prayer, work, simplicity, and hospitality. Though known as a rule for monks, it is addressed to all those who seek "to do battle for Christ the Lord, the true King."

Benedict's life was marked by various intrigues & miraculous incidents, which are described in his biography written by Pope St. Gregory the Great. One of the most remarkable was his meeting in 543 with Totila, King of the Goths, in which the abbot rebuked his lifestyle and prophesied his death.

St. Scholastica, Benedict's sister, also embraced religious life as a nun. She most likely died shortly before him, around the year 543.

In his final years, the abbot himself had a profound mystical experience, which is said to have involved a supernatural vision of God and the whole of creation. Around age 63, Benedict suffered his final illness. Although his influence was primarily felt in Western Europe, St. Benedict is also celebrated by the Eastern Catholic churches, and by Eastern Orthodox Christians, March 14.

ST. MARGARET OF ANTIOCH: JULY 20, 2018

Saint Margaret, whose feast is celebrated on July 20, is a virgin and martyr. She is also called "Marina". Margaret belonged to Pisidian Antioch in Asia Minor, where her father was a pagan priest. Her mother died soon after Margaret's birth, so she was nursed by a pious woman who lived about five or six leagues from Antioch. Having embraced Christianity and consecrated her virginity to God, she was disowned by her father and adopted by her nurse.

One day, while she was engaged in watching the flocks of her mistress, a lustful Roman prefect named Olybrius caught sight of her, and attracted by her great beauty sought to make her his concubine or wife. When neither cajolery nor threats of punishment could succeed in moving her to yield to his desires, he had her brought before him in public trial at Antioch. Threatened with death unless she renounced the Christian faith, the holy virgin refused to adore the gods of the empire. An attempt was made to burn her, but the flames, we are told in her Acts, left her unharmed. She was then bound hand and foot and thrown into a cauldron of boiling water, but at her prayer her bonds were broken and she stood up uninjured. Finally the prefect ordered her to be beheaded.

The Greek Church honors her under the name Marine on July 13, and the Latin, as Margaret on July 20. Her Acts place her death in the persecution of Diocletian (A.D. 303-5), but in fact even the century to which she belonged is uncertain. St. Margaret is represented in art sometimes as a shepherdess, or as leading a chained dragon, again carrying a little cross or a girdle in her hand, or standing by a large vessel which recalls the cauldron into which she was plunged. Relics said to belong to the saint are venerated in very many parts of Europe; at Rome, Montefiascone, Brussels, Bruges, Paris, Froidmont, Troyes, and various other places. Curiously enough this virgin has been widely venerated for many centuries as a special patron of women who are pregnant.
